

Cornerstone MFT Server Technical Specifications

Secure file transfer is standard in today's business world. But simply securing your file transfers is not enough. Your solution needs to provide visibility into all file activities, while assuring that files are securely stored, and your network protected. Your solution needs to be scalable to grow as your requirements change. And it needs to provide the automation capabilities to keep your business processes flowing. Cornerstone MFT is packaged as a complete solution that offers all of these capabilities.

Cornerstone MFT Security Features

Cornerstone's advance feature set is trusted by international banks, healthcare organizations and government agencies worldwide. Cornerstone MFT provides:

Secure File Storage

Real-time streaming PGP engine ensures data at rest is never vulnerable

NSA/Government-grade secure file delete prevents unauthorized recovery of deleted data

Perimeter security with optional DMZedge server:

- Close inbound firewall ports to reduce the risk of port-scanning breaches
- Dynamically opens an outbound connection and accepts responses only
- No data stored in DMZ; pass-through only

Secure File Transfers

SFTP, FTP/S, HTTP/S, WebDAV/S and transfers

Refuse unsecure connections

File Integrity Checking

FIPS 140-2 compliant encryption (AES and TLS)

Server Access

LDAP, Active Directory and ODBC Authentication

2-Factor Authentication with RSA tokens when used with WebDrive

Complex Password Policies

IP Blacklisting and Whitelisting

DoS and hammering rules and notifications for auto-banning Users and IPs

User and Group level permissions

Cornerstone MFT Productivity Features

Scalability

Clustering and load balancing for High Availability
Active/Active Failover
UNC paths for unlimited storage capacity
Virtual Folders
Multi-tenancy configuration

Simple User Interface

Intuitive web browser interface for transferring and sharing files
Optional WebDrive Client allows in-place editing
WebUI and Client for iOS and Android devices

Customization

Web User Interface customization and branding
API Interface

Visibility into User, File and Server activity

SYSLOG
Report generator with 25 pre-defined reports
Track file accesses, user activity and server events

IT approved File Sharing

Simple file sharing with full tracking
File links with view-only or download permissions
Collaboration with file locking when used with WebDrive

Multiple Deployment Options

Cornerstone MFT is available on-premise, in the cloud or a hybrid approach. The Cornerstone MFT Server software is a complete solution that does not require costly add-on modules. Options include the DMZedge Server license and WebDrive virtual drive client software. WebDrive Mobile is available at no additional cost.

Trial Licenses

Cornerstone MFT leverages your existing network infrastructure, back end systems and authentication. A full function trial software license is available. See how Cornerstone performs in your network environment.
